25X1 [redacted]

This is a copy of a document. It is a Top Secret Directive put out by the Security Authority within the Communist Executive called "Wydzial B". This institution descends directly from the PPR Politburo and is the highest security office in Poland. It can be compared with the Nazi S.D.

This directive is in effect during the amnesty period and is specifically directed at the leading cells of the N.O. Internal number WBI9-27-72-17.

The fight against the Underground must be conducted by infiltration and complete intelligence about their leadership after which they will be destroyed.

To fight the Underground two different methods will be adopted:

a. The most ruthless action will be used against the Underground Staffs by extermination and destruction of their property. It is imperative to unddrstand that these people are our greatest enemy and will never work loyally with us.

b. Those of the opposition and of the Fascist organisation who have gone along with us at the very beginning of our democratic popular build-up and those who came out during the first amnesty declared by the Government and who since are occupied in useful work, have joined the party and are loyally working with us, those will be left alone.

c. Toward those who are ordinary members and are nothing but pawns mild treatment will be used and if they are willing to become informers, leniency and discharge from prison will be adopted. The public will be persuaded of the uselessness of Underground action. Thus its bases will be cut off.

d. Educational action will be instituted through the party, organizations, teachers and clergy, this action aiming at the stoppage of a further involvement in underground work of youth especially.
